

## The Reincarnation Trap 2

by Jan Erik Sigdell

This is a continuation of my earlier text **The Reincarnation Trap** (<http://www.christian-reincarnation.com/PDF/Retrap.pdf>) and is based upon inspirations early October 2021. I sometimes have inspirations in the night, especially before I wake up. I then see certain things clearly and this may still be there in the very moment of awakening and then fade away, even though in some cases pieces of it (if at all) may remain conscious.

At the end of the text referred to above it is mentioned that if you can overcome its intense brightness and enter a big light, you can exit from the “wheel of incarnations” and enter other dimensions. But if you pass by that light without entering it, you will go to your next incarnation and remain in this world’s “wheel.” So it is said in the *Tibetan Book of the Dead*.

What is this very bright light? It is the Sun! Why do I say that?

First I have to refer to another text by me: **Could a Globe in the Universe actually be a Hole?** (<http://www.christian-reincarnation.com/PDF/Globe.pdf>). This text is for many a bit difficult to understand as it is meant to tell, because it requires a certain amount of mathematical thinking of a stereometric kind which is not in everyone’s mind. The consequence is then (as concerns the Sun) that the Sun with a high probability is a *portal to higher dimensions*. It has been reported several times that very big (presumably) space vehicles came out of the Sun as if from another dimension\*. The light of the Sun does not come from itself, but *through* it, also from other dimensions. So also the heat radiation, since then the Sun would not be incineratingly hot but would likewise also let this radiation through that because of its own energy would be perceived as burningly hot. It would most certainly not incinerate the soul (the soul is immortal and thus also not combustible).

Another earlier text is entitled **A Study about the Origin of Evil** (<http://www.christian-reincarnation.com/PDF/evil.pdf>) and describes, especially according to the Gnostic-Christian original texts, that in the original creation by El Elyon (“The Highest God) there in the very beginning were two high entities – angels of the original light – who were to organize the creation: Satanael and Autogenes (= Christ, “The Anointed One”). The two had different opinions about how the order in the creation should be, cf. (even though in German) **Zwei Hierarchien in der Schöpfung** (<http://www.christliche-reinkarnation.com/PDF/Hierarchien.pdf>). Satanael (the name may mean something like “administrator“) had a concept of a vertical, pyramidal hierarchy in the form of levels in a power structure, where each level would have “power” over the ones below but obey the ones above. Christ had another concept, a horizontal hierarchy in which each entity would be of equal value and would cooperate with the others in love. However, Satanael became presumptuous and wanted himself to be at the top of the pyramid and even higher than the creator god. He, therefore, was cast out of the light world of the original creation and through some transfigurations as Satan (without the *-el*), Yaldabaoth and then Yahweh became an outsider in an obscure world that was an enclave separated from the original creation. There he established a pyramidal hierarchy with himself at the top and with archons on the top level. One should there believe that he – now calling himself Yahweh – would be the one and only god and there would be no other. El Elyon should be forgotten. This is the world in which we are living ... through temptations and lies attracted to incarnate here.

He wanted to separate himself completely from El Elyon in rage for being cast out. He had, however, to unwillingly accept that El Elyon radiates his life-giving energy to us, since this energy is also our life energy and we could not live without it, and then Yahweh would no more have his subordinates ... His long-term plan remains, however, to separate himself complete from El Elyon. The entities in this enclave, who are being fed by El Elyon’s light, are what we call “biological” – humans (incarnated souls), animals, trees, plants – and for that reason he wants to eradicate the “biology” – and that is going on at full speed today ... He instead wants to establish a world of machines that is independent from El Elyon’s light, especially a world-wide digital network that with 5G (and

higher) connects computer systems with an artificial intelligence, which he wants to become himself. We would then become software components, disincarnating into that system, with an artificial “god” in place of El Elyon.

So far there is still a “hole” in Jahweh’s world through which El Elyon’s light is coming to us: **the Sun!** This has to be so at present, since we would otherwise die. A hole that Yahweh wants to close at the end, but so far our escape out of this dark world, as long as it is there.

***Therefore: After leaving your body, stay away from every tunnel and go to the Sun, and then go in and through it!***

We may now ask ourselves why there were two alternatives ways in the beginning. Was this some kind of an experiment to find out which way would be more successful? Would El Elyon have engaged in an endeavor *at the expense of humans in times to come?* Hard to imagine ... Or did something go wrong in an unforeseen way? Why has he allowed Satan to go his own way, with lies and fraud bringing rather innocent souls along with him? Would it not have been better to revoke the creation of the renegade, or at least make him rather harmless?
